Marking Criteria

Submits by 12 noon on the 25th of May 2021 by email to `t.stafford@shef.ac.uk`

Answers the questions in the headings below, showing evidence of engagement with the course

Note: I expect and hope that all students can get full marks for this assessment. There is no word limit, but short is sweet. I suggest you write between 3 sentences and 3 paragraphs for each.

Final Self-assessment for PSY6422

1. Which topic did I find most useful or interesting? Explain why

I found the data management and version control the most useful. I always had issues with repeated codes for a long time. I was pleasantly surprised to learn the techniques to prevent the heartburn of finding the recent code. I liked how intuitive it was to catch the stacked layered approach followed the code. It was easy to learn and follow the flow of functions.

2. Which topic did I find least useful, interesting or most difficult? Explain why

I didn't find any topic difficult to follow honestly. However, I would have found it really useful to see a detailed git merges and cloning of codebooks live to follow the changes.

3. What topics do I want to learn more about in the future? Explain why

I would like to learn more about animated plots and how to use multiple languages in RStudio. I liked the way animated plots tell a story. I would personally like to learn a little more feature of R that support data science techniques.

4. Please share one thing you have read and enjoyed or found useful on the topic of data management and/or visualisation

I have found the entire module really enjoyable. I found project organization the most useful. I make it a point to put in the initial efforts to follow the steps in order to avoid redoing mending inconsistencies later.
